Overall, the Town's sewer system is in good shape. The main issues we encounter in our system stem from inflow and infiltration and root and grease buildup in the lines. We are consistently replacing old sewer lines, videotaping to identify trouble areas, and sealing older manholes.

2021 - We did not have any violations.

Spills that were less than the required overflow, we have not listed. Spills that do not enter surface water are dammed up to prevent spreading downstream and treated with an application of lime and then removed and taken to the Moore County Waste Water Treatment Plant.

I, certify under penalty of law, that this report is complete and accurate to the best of my

knowledge. I further certify that this report has been available to the users or customers of the named system and that those users have been notified of its availability.
